Spam Volume Jumps 35% in November

Posted by CowboyNeal on Thu Dec 21, '06 06:51 PM
from the crazy-email-subject-lines dept.

gregleimbeck writes

"Spam volume soared another 35% in November, an e-mail security vendor said Thursday, and the month saw spam tactics that reduced the efficiency of traditional anti-spam filters. There's been a huge increase in spam volume,' says David Mayer, a product manager at IronPort Systems, 'from 31 billion spams a day on average in October 2005 to 63 billion in October 2006. But in November, we saw two surges that averaged 85 billion messages a day, one from Nov. 13 to 22, the other from Nov. 26 to 28.'

**Vista Zero-Day Exploit For Sale**

Posted by kdawson on Sat Dec 16, '06 04:02 PM
from the crack-bazaar dept.

Snakepit Bit writes

"Underground hackers are hawking a zero-day exploit for Windows Vista at $50,000 a pop, according to computer security researchers at Trend Micro. The Windows Vista exploit, which has not been independently verified, was just one of many zero-days available for sale at an auction-style marketplace infiltrated by the anti-virus vendor. Prices for exploits for unpatched code execution flaws are in the $20,000 to $30,000 range. Bots and Trojan downloaders that typically hijack Windows machines for use in botnets were being sold for about $5,000."

From the article:

"According to [Trend Micro CTO Raimund] Genes, the typical price of a destructive exploit has increased dramatically, driving an underground market that could exceed the value of the legitimate security software business. 'I think the malware industry is making more money than the anti-malware industry,' Genes said."
“The only truly secure system is one that is powered off, cast in a block of concrete and sealed in a lead-lined room with armed guards - and even then I have my doubts.”

IT'S PEANUT BUTTER JELLY TIME!!!
It’s Peanut Butter Jelly Time!

Take 1

Locate jars of peanut butter and jelly, a loaf of bread, and a knife.

If customer orders special sandwich

If only jelly requested then

Dip knife into jelly and spread across bread

Add another piece of bread and give to server

Else if only peanut butter is requested then

Dip knife into peanut butter jar and spread on bread then

Add another piece of bread and give to server

Else

If customer orders regular sandwich

Dip knife into peanut butter and spread across bread then

Dip knife into jelly and spread across bread then

Add another piece of bread and give to server
It’s Peanut Butter Jelly Time!

Take, er, never mind
It’s Peanut Butter Jelly Time!

Take 2

2. Locate jars of peanut butter and jelly, a loaf of bread, and a knife, then
   2. open bag of bread and remove two slices then
      3. remove lid from peanut butter jar and jelly jar then
   4. if peanut butter or jelly are empty then
      5. get a new jar
   6. else give up
      7. using knife spread peanut butter on one slice of bread then
         8. using knife spread jelly on top of peanut butter then
         9. place second slice of bread on top of first then
         10. eat
It’s Peanut Butter Jelly Time!

Take 3

1. Locate jars of peanut butter and jelly, a loaf of bread, and a knife.
2. ...

Google buys YouTube for $1.65 billion

Search giant’s purchase of video sharing service biggest in its history

Associated Press
Updated: 10:47 a.m. ET Oct 10, 2006

SAN FRANCISCO – Internet search leader Google is snapping up YouTube for $1.65 billion, brushing aside copyright concerns to seize a starring role in the online video revolution.

The all-stock deal announced Monday unites one of the Internet’s marquee companies with one of its rapidly rising stars. It came just a few hours after YouTube unveiled three separate agreements with media companies to counter the threat of copyright-infringement lawsuits.

The price makes YouTube Inc., a still-unprofitable startup, by far the most expensive purchase made by Google during its eight-year history. Last year, Google spent $150.5 million buying a total of 15 small companies.
